

Vakaro Series

mid-century modern – unique set for your interior

About Nest Design

What do we do?

We have been creating wooden furniture and accessories for over four years. We specialise in making bespoke furniture. If you dream of an exotic ebony table, a huge oak wardrobe or a fancy walnut bookcase – you are in the right place. It is us who will make your dreams come true.

**We are guided by one goal –
to create furniture perfectly
suited to the customer's needs.**

Each project is created as a result of a dialogue. You tell us about your expectations, desires and needs and we listen, advise and design the best possible solution. As a result, each piece of furniture, not only fits perfectly into the given interior, is beautiful and functional, but also reflects your unique personality.

Our history

Nest Design was born out of an unmet need. When we were looking for a wooden table for our new place, none of the offers available on the market met our expectations. We didn't want to compromise. So we came up with the idea that we would make the wooden table top ourselves. As our company at the time specialised in labelling gadgets, vehicles and personalised advertising, we had a workshop that allowed us to take on this task.

Making the wooden top ourselves was a lot of fun and the table satisfied all our needs. And that's when the thought occurred to us – if we weren't able to find the perfect table, maybe others have these problems too? Why not help them?

That's how the idea of Nest Design was born.

We started to learn, train our team, create furniture for our first clients. It turned out that we were right – people needed a place that listened to their needs and dreams. Clients kept coming back to us for more projects, and their satisfaction continues to drive the company forward.

The unique metal decor on Vakaro furniture adds a strong and convincing character. Real metal gives a unique effect, unmistakable with veneers or prints and introduces a subtle and rich style to the interior.
